## STEADY GROWTH OF INTEREST IN UNIVERSAL EXPOSITIONS.

Fifty-three Foreign Governments Already Have Accepted Invitations to Participate in St. Louis World's Fair and Forty-two of Them Have Appropriated \$6,339,650-Only Forty-six Took Part in Chicago Show, and They Spent Only \$5,763,10%.

The Republic Bureau, 14th St. and Pennsylvapia Ava. Washington, Aug. 16.—It is still nearly nine months before the opening of the Louisiana Purchase Exposition, but, by way of illustrating the generous treatment which has been accorded this enterprise by foreign Governments, with perhaps an unlerstanding why such treatment has been accorded, it may be interesting to draw a on, even at this early date, between the Governments participating and the amounts expended by them at the Columbian Exposition; held in Chicago ten years ago, with those which have accepted the invitation to be represented in St. Louis, together with their estimated expenses in

Forty-six foreign Governments were repesented at Chicago, and their aggregate expenses for exposition purposes amounted to \$5,762,103, while at this time fifty-three countries have accepted the invitation to exhibit at St. Louis, forty-two of which ve appropriated the sum of \$6,339,650 to defray the expenses of their exhibits, while eleven of those which have signified their intention of exhibiting have not yet made their appropriations, and there are still fourteen countries to be heard from.

Thus it will be seen that the interest in expositions has increased as the respective Governments realize the advantageous re-

their products so constantly before the

their products so constantly before the world.

In this connection a resume of the report of the Bureau of Statistics on the increased consumption of foreign merchandise by the United States will serve to illustrate the natural cause of the increased interest manifested by foreign. Governments in the Exposition:

Thirteen of the leading commercial and manufacturing nations protested against the present tariff when it was adopted in 187, yet, from 188 until 1902, there was an increase in the total imports into this country from those nations of 180,802,896, or about 75 per cent. The monthly summaries of imports and exports published by the United States Bureau of Statistics for the fiscal year ending June 30, 1903, shows that the total value of imports for that year will exceed \$400,000,000, being \$100,000,000 in excess of the imports for that year will exceed \$400,000,000, being \$100,000,000 in excess of the imports for the eleven months of the fiscal year 1903 the importations exceeded those of the corresponding months of 1902 from Great Britain by \$34,-564,309; France, \$5,34,433, and Italy, \$5,516,-284, with a correspondingly large increase throughout all Europe.

The foregoing figures indicate how every mation catering to the United States markets is increasing its exports to this country. Thus it can readily be seen where the business side of an exposition lies and what incentive is offered a country for expending thousands of dollars in exhibiting at a universal exposition such as will be held in St. Louis next year, for the purpose of displaying its products to thousands of visitors from all parts of the world who are attracted by a World's Fair.

### POLICE BELIEVE ROBBERS LOOTED, THEN FIRED SCHUCHMANN HOME

Schuchmann regidence, at No. 1525 Missouri avenue, which is supposed to have been set on fire by burglars.

The mysterious fire which visited the palatial home of Gustavus Schuchmann, a well-known real estate man, of No. 1525

Patroiman James Corcoran discovered the Missouri avenue, early yesterday morning causes the Police Department to suspect in-

cendiarism, with robbery the motive. The residence, which is one of the finest in the Lafayette Park district, was almost gutted by flames before the fire was dissults which are to be derived from placing covered, and residents in the vicinity, who are of the belief that the fire was the work

> of burglars. One of the strange features of the case is the fact that no one was home at the time the fire was discovered. Mr. Schuchmann, after securely fastening the house, left the city at 8:30 Saturday evening for Bath Beach, Mass., to join his family. The fire

was discovered at 1 a. m.

It was Mr. Schuchmann's intention to bring his family home, and in his absence his negro servant, "Boots" Martin, had charge of the premises. Martin only had acces to the kitchen, and depot and then went to call on friends.

When he returned home he found his master's property destroyed. Martin only had excess to the kitchen, and strange to say, that was the only part of

the house that was not touched by fire. The negro declares the premises were left in exemplary order. No gas jets were burning, and it is said the house was wired in a man-

Stroughan, who was in the vicinity, but the two could not force an entrance. The officers did not know the family was absent.

When Patrolman Corcoran discovered the fire the inside of the house resembled a furnace filled with a dark lurid flame. The fire then had not eaten its way through the roof, but the window panes on the second story were popping from the heat.

After the arrival of the department a stubborn fight ensued for mastery. Before the flames were extinguished the property was so badly damaged that the place where the fire originated could not be determined. W. M. Ladd, who is a personal friend of the Schuchmanns, shares the belief with the police that the premises were est on fire by robbers. It is believed that an entrance was effected to an upstairs window by ladders, which were placed in the back yard Saturday by painters who were to clean the front of the building to-day.

Mr. Ladd telegraphed to Peru, Ind., early Sunday morning in an endeavor to head off Schuchmann at that place. The telegram was not delivered, however, and another was sent to Buffalo yesterday at noon.

The Schuchmann home is said to be worth \$40,000. The damage, it is believed, will reach half that figure. In the house were three fine planos, which were burned to ashes, and a library of 2,000 volumes, of which there is not a vestige.

It is not known whether the premises yesterday, according to the police on guard.

Gumberts is known among his fellow-patients as "the man with the musical heart," and some of them fancy that the regurgitations produced can be heard several feet away. It is commonly believed that the irregularity in his heart's functions produces a distinct musical air that is plainly audible. Cardiac murmur, or what is sometimes termed the "musical heart," is not rare. There have been several cases at the City Hospital. It is usually caused by a defective valve in one of the aortas. The musical quality in Gumberts's heart beat is due to what is termed aortic strenosis, or a narrowing of the orlace through which the blood flows from the left aorta. This produces a rushing sound which is augmented by a backward rushing of the blood through a defective valve in the left aorta. The two defects cause the unusual but not displeasing sound which may be heard in Gumberts's chest, and which is responsible for his being dubbed "the man with the musical heart." the ear to the chest, they claim, deep in-

The causes of the rapid falling off of the allotted time of man's existence is no doubt traceable to meat eating. From the Creation to the Deluge animals were used for sacrifice, but not for food. REPUBLIC SPECIAL Washington, Aug. 16.-With scandal investigations going on in three departments, President Roosevelt and his Cabinet mempers are having little vacation.

The Indian land scandals, just brought to the attention of the Department of the In-terior, promises to prove almost as sensational as the glove contract scandal in the War Department, in which Representatives Littauer of New York is involved, and the scandals in the Post-Office Department. which have resulted in a score of indictnents and removals.

Friends of the administration insist that it cannot be injured by the sensational de elopments in the three departments. The irregularities were inherited and they say it is to the credit of President Ro that they have been so fearlessly investi-gated under his direction.

The charge that Government officials in Indian Territory have conspired to defraud Indians by leasing and buying their lands at ridiculously low prices is now entirely in the hands of Secretary Hitchcock. The case

Decency of speech and conduct constituted the theme of his address, which was enthusiastically applauded by an audience of more than 2,000 persons, chiefly men. During the afternoon special trains brought hundreds of members of the society to Oyster from Brooklyn and Western Long Island.
